

How to Download a Secure Browser on a Windows Computer

To ensure secure assessment administration, students must access the California Assessment of Student Performance and Progress (CAASPP) and English Language Proficiency Assessments for California (ELPAC) using a secure browser. This secure browser is available for personal computers running supported Windows operating systems.

- 1 Navigate to http://www.bit.ly/spring_21.
- 2 Select **Download the Secure Browser** in the sidebar.
- 3 Select **Secure Browser for Windows**.
- 4 Select the **Download the Secure Browser for Windows** button.
- 5 Once the file has downloaded, select the **Run** button to open the Setup Wizard.
- i* If presented only with the option to save, save the file to a convenient location. Open the **CASecureBrowser12.5-2020-06-17-i686.msi** installation file to launch the Setup Wizard.
- i* A pop-up window may appear warning that files might be harmful to your computer. If this program was downloaded from the provided web page, it is safe to download and install. Select **OK** or **Run** to install the secure browser.
- 6 Follow the instructions in the Setup Wizard. When prompted to choose a setup type, select the **Install** button.
- 7 Select the **Finish** button. A shortcut icon will appear on the Desktop.
- 8 When testing, close all running programs and launch the **CASecureBrowser** from the Desktop shortcut.
